

Grc 25 Fireworks/Dreamweaver

Macromedia Fireworks image editing program for Internet and desktop publishing. Image capture, manipulation and export for web page integration. Macromedia Dreamweaver is used in conjunction with this program in order to generate html pages to be displayed in an Internet browser. Both Fireworks and Dreamweaver are used together in GRC15 and GRC16.

Introduction, Policies, Procedures

1. Computer Terminology
 - A. Resolution Issues
